- Preconfigured Lateral Files
- Storage Cabinets/Bookcases
- Pedestals
- Vertical Files
- Office Furniture Contract Holder

GENERAL INFORMATION

BSI lateral files are designed on a 1 1/2" module to provide an unparalleled degree of internal flexibility. Interior components are available 3", 6", 7 1/2", 9", 10 1/2", 12", 13 1/2" and 15" high. These components are designed to efficiently accommodate virtually any filing and storage requirement.

To assure BSI files are compatible with panel systems, desks or custom architectural details, Cabinets are available in 40 different heights.

Preconfigured Units

To simplify the specification process, BSI offers preconfigured files and storage Cabinets in the most popular sizes with the most popular internal components. These units are assembled using standard components. Lateral files and storage Cabinets can be field-retrofitted and updated by specifying componentry from the Custom-Built section of this price list.

Height

Lateral files and storage Cabinets are available in 40 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

All lateral files and storage Cabinets are 18" deep.

Width

Lateral files and storage Cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions

Refer to the illustrations on page 3 for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES**Basic Shell**

Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1 1/2" centers. Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers

Drawer fronts, 20-gauge steel with full-width flush inset pull and label holder. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 20-gauge steel slotted on 1 1/2" centers to accept dividers. Leading edge formed to provide pull; center section offset for additional strength. Shelf ends, 18-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Components have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.2-1989 standards for lateral files when recommended counterbalance weight is installed.

Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 95° to prevent contact with adjacent cabinet and full height vertical flush inset pull.

Shelves

Blank shelf, 22-gauge steel, formed 1" thick on front and back edges. End Tab Shelf, 22-

gauge steel shelf and back, 20-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Preconfigured lateral files meet or exceed ANSI/BIFMA X5.2-1989 standards.**Receding Door**

20-gauge steel with full-width flush inset pull and label holder. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation.

The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams illustrate typical use. Additional interior options can be installed behind a receding door.

Note: Dimensions have been taken from the front raised edge of the roll-out shelf .**Accessories**

Plate dividers, 18-gauge steel, notched to lock into shelf.

Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength.

Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet. Can be used behind 13 1/2" and 15" receding doors and hinged storage cabinet doors.

Adjustable Glides

Lateral files and storage Cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock

All Cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tip over by permitting only one drawer to be opened at a time. With some unique combinations an individual drawer may not be controlled by the interlock. In these instances a caution label will be affixed to the drawer body.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 200 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed.

Standard Paint Finishes

All BSI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified 40 sheen polyester enamel. The enamel is baked on to provide a scratch- and stain-resistant surface.

All inside and outside shell and drawer front surfaces are painted with the same specified paint color.

Interior components and accessories are Dark Tone. Mechanical components are black chrome-plated.

Powder coated/enamel finish colors listed

here are available where specifications call for painted surfaces.

40 Sheen powder coated/enamel finish Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

- Two steel color chips (minimum 3"x5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.
- Textured paint finishes are available at a 5% upcharge. BSI has a set of standard textured paints available at a 5% upcharge. All other nonstandard textured colors follow the same procedure for color matching as listed above.
- Special Metallic or Mica finishes must follow the following procedure:

All Metallic and Mica finishes are subject to an upcharge. The upcharge will be based on the particular color requested.

All Metallics or Micas must provide a steel color chip sample.

All Metallic or Mica finishes require a 3-week turnaround on samples and do require an extended lead time on the actual order.

Please be aware that metallic finishes can be inconsistent. The metal fleck can create patterns that are visible on large flat surfaces.

INSTALLATION**Caution Labels**

Caution- and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.

Caution information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information.

Installation Information

Complete instructions on the proper installation and use of BSI files are provided in each file shipped. The instructions refer to correct methods of leveling, ganging and loading. **Counterbalance weights should be installed in all single freestanding files.**

Field Reconfiguration

As needs change, BSI lateral files and storage Cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number.
3. Options.
4. Any special services required.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select a color.

- BL = Black
- WG = Warm Grey
- GR = Grey
- SA = Sand
- LG = Light Tone
- CO = Cottonwood
- CW = Creamy White
- MZ = Moss
- CE = Chamomile
- CF = Cafe au Lait
- GX = Grape
- BD = Bordeaux
- CY = Cayenne
- AC = Abracadabra
- FN = Flannel

- DO = Dolphin
- HX = Thermal
- SH = Splash
- MR = Marine Teal
- ND = Nordic
- WP = Whisper
- TO = Tangelo
- SU = Sunburst
- LC = Lemon Cream
- WS = Wet Sand
- CM = Champagne Metallics
- EX = Espresso Metallic
- MM = Malachite Metallic
- MO = Moonbeam Metallic
- OM = Old Gold Metallic
- SX = Starlight Sliver Metallic

- ZM = Bronze Metallic
- CP = Other Standard Paint Color

For dock delivery add 5%.
For installation add an additional 8%.

Specifications and prices subject to change without prior notice.

Shipping

Packing shall be at the discretion of BSI and is dependent upon sizes and quantities of order.

www.buybsi.com...It's quick and easy.

GENERAL INFORMATION

BSI pedestals are available in sizes and drawer combinations to suit any personal storage requirement. Freestanding and mobile units are designed to fit below most worksurfaces. Hanging and worksurface supporting units are sized to fit under BSI Systems furniture. A mounting kit is provided with each unit to allow installation under other compatible workstations.

Preconfigured Units

To simplify the specification process, BSI offers preconfigured pedestals in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height

Four pedestal styles are available. Heights include 1/4" allowance for leveling glides fully recessed. Worksurface Supporting: 24¹³/₁₆", 27⁷/₈". Freestanding: 22³/₈", 25⁹/₁₆". Mobile: 21¹¹/₁₆", 24⁵/₈", 27⁹/₁₆" Hanging: 19³/₁₆", 22¹/₈", 25¹/₁₆".

Depth

Products are available in three standard depths: 17⁵/₈", 21⁵/₈" and 27⁵/₈".

Width

All products are 15" wide.

Drawer Dimensions

Refer to the illustrations on page 31 for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Twenty-gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

Drawers

Fronts: Two-piece metal construction. Twenty-two gauge steel outerskin welded to 22-gauge inner liner. With full width inset pull. Drawer fronts overlap front of pedestal.

Three-inch (pencil) drawer: Single wall two-piece construction. Body 22-gauge; back 22-gauge. Operates on two section 3/4 extension ball bearing suspension.

Six-inch (box) drawer; single wall two-piece construction. Body 22-gauge; back 22-gauge. Operates on two-section 3/4 extension ball bearing suspension.

Twelve-inch (file): Single wall, two-piece construction. Front liner 20-gauge; body 22-gauge. Mounted on full extension slide arm suspensions.

Adjustable Glides

Freestanding and supporting pedestals include four glides, adjustable from outside the cabinet. Standard glides provide 1" adjustment.

Counterbalance

Counterbalance weight is standard in all mobile units and all freestanding units.

Caster Kit

Consists of four twin-wheel hooded casters. Front two casters are locking; rear two casters are non-locking. Counterbalance weight included in all mobile units.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 200 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed.

Paint Finishes

All BSI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified 40 sheen polyester enamel. The enamel is baked on to provide a scratch- and stain-resistant surface.

All inside and outside shell and drawer surfaces are painted with the same specified paint color.

Interior components and accessories are painted Dark Tone. Mechanical components are black chrome-plated.

Powder coated/enamel finish colors shown in Color Card 1 in the BSI Fabrics & Finishes binder are standard and are available where specifications call for painted surfaces.

Color Card 1: 40 Sheen powder coated/enamel finish

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

1. Two steel color chips (minimum 3"x5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
2. All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.
3. Textured paint finishes are available at a 5% upcharge. BSI has a set of standard textured paints available at a 5% upcharge. All other nonstandard textured colors follow the same procedure for color matching as listed above.
4. Special Metallic or Mica finishes must follow the following procedure:

All Metallic and Mica finishes are subject to an upcharge. The upcharge will be based on the particular color requested.

All Metallics or Micas must provide a steel color chip sample.

All Metallic or Mica finishes require a 3-week turnaround on samples and do require an extended lead time on the actual order.

Please be aware that metallic finishes can be inconsistent. The metal fleck can create patterns that are visible on large flat surfaces.

Field Reconfiguration

As needs change, BSI pedestals can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Select an upholstery fabric. Fabric swatches are available online and by request.

INFORMATION

Weight

Figures provided are approximate and reflect packaged product without additional accessories.

GENERAL INFORMATION

BSI vertical files are designed on a 11" module.

To assure BSI files are compatible with panel systems, desks or custom architectural details, Cabinets are available in 4 different heights.

Height
Vertical files are available in 4 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
All products are 27 7/8" deep.

Width
Cabinets are available in two standard widths: 15" and 18".

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. 5-drawer Cabinets also feature a welded tie bar midway in the shell.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers
Drawer fronts, 20-gauge steel double wall with full-width flush inset pull and label holder. Fronts are screw-mounted to shelves to build drawers. Shelf body, 20-gauge steel. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions. Components have been tested to accept loads of 75 lbs.

Adjustable Glides
Cabinets are supplied with two adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Locks
Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 200 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed.

Standard Paint Finishes
All BSI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified 40 sheen polyester enamel. The enamel is baked on to provide a scratch- and stain-resistant surface.

All inside and outside shell and drawer front surfaces are painted with the same specified paint color.

Interior components and accessories are Dark Tone. Mechanical components are black chrome-plated.

Powder coated/enamel finish colors listed are available where specifications call for painted surfaces.

BL Black	ND Nordic
WG Warm Grey	WP Whisper
GR grey	TO Tangelo
SA Sand	SU Sunburst

CY Cayenne	SX Starlight Silver
AC Abracadabra	ZM Bronze
FN Flannel	CP Other Standard
DO Dolphin	
HX Thermal	
SH Splash	
MR Marine Teal	

Color swatches are available online and by request.

Special Paint Finishes
All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

1. Two steel color chips (minimum 3"x5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
2. All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.
3. Textured paint finishes are available at a 5% upcharge. BSI has a set of standard textured paints available at a 5% upcharge. All other nonstandard textured colors follow the same procedure for color matching as listed above.
4. Special Metallic or Mica finishes must follow the following procedure:

All Metallic and Mica finishes are subject to an upcharge. The upcharge will be based on the particular color requested.

All Metallics or Micas must provide a steel color chip sample.

All Metallic or Mica finishes require a 3-week turnaround on samples and do require an extended lead time on the actual order.

Please be aware that metallic finishes can be inconsistent. The metal fleck can create patterns that are visible on large flat surfaces.

www.buybsi.com...It's quick and easy.

GENERAL INFORMATION

BSI Storage/Bookcases have been designed to optimally store standard three-ring binders on all shelves. Shelves are adjustable on 1" increments to accommodate other media storage needs.

The units described on the following pages are to suit the most common storage requirements. Other bookcase sizes can be built to suit specific needs. Contact BSI Sales for details.

Height

Bookcases are available in four standard heights. Other heights will be considered on a special order basis, contact BSI Sales for details. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

Bookcases are available in two standard depths: 12" and 15".

Width

All bookcases are 30" and 36" wide.

Shelf Clearance

Refer to page 43 for height and depth clearance dimensions.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shells are unique to bookcases, featuring a flush inner liner. The liner is punched to accept shelf brackets on 1" increments, starting approximately 8" from the bottom of the cabinet and terminating approximately 8" from the top of the cabinet. The liners, top and bottom reinforcements are welded into a rigid box frame. The shell is constructed from 18- and 20-gauge steel, with multiple strategically located offsets to maximize strength. The back is seamless. All corners are reinforced.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Shelves

Shelves are constructed using 22-gauge steel, formed 7/8" thick on the leading and trailing edges to enhance strength.

Adjustable Glides

Bookcases are supplied with four adjustable glides. The glides can be adjusted from inside the bookcase using a 1/4" hex socket wrench, or from outside the bookcase using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall bookcase heights include the glide in its recessed position.

Standard Paint Finishes

All BSI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified 40 sheen polyester enamel. The enamel is baked-on to provide a scratch- and stain-resistant surface.

Specifications

BSI Storage/Bookcases are manufactured to the same high standards of quality and value as our Lateral Files and Storage Cabinets. The shell and shelves are constructed of 20-gauge steel, offset and channel formed to enhance strength. Adjustable glides are located in each corner to provide for exact leveling. Shelves are adjustable in 1" increments and re-designed to facilitate storage of binders on each shelf.

					A	B			

Specifications

BSI Storage/Bookcases are manufactured to the same high standards of quality and value as our Lateral Files and Storage Cabinets. The shell and shelves are constructed of 20-gauge steel, offset and channel formed to enhance strength. Adjustable glides are located in each corner to provide for exact leveling. Shelves are adjustable in 1" increments and re-designed to facilitate storage of binders on each shelf.
